

# StriveSafe | Diagnostic Port Types

Reference the images below to confirm your vehicle port type

## Light-Duty Cars & Trucks

- ✓ Everything from a Toyota iQ to a Ford F-550
- ✓ OBDII port is in all light duty vehicles manufactured after 1996
- ✓ Rectangular shape usually located under the dashboard on the drivers side of vehicle

OBDII

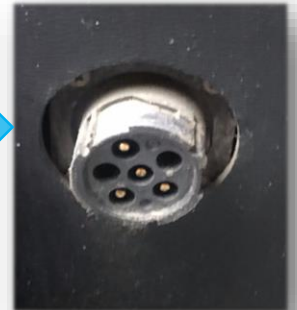

## Medium & Heavy-Duty Trucks

- ✓ Everything from an F-650 to a dump truck to a giant semi
- ✓ There are two adapter cables for heavy vehicles: J1708, typically used for older vehicles and J1939 typically used for newer vehicles
- ✓ Both connectors are round. J1708 has 6 pins and J1939 has 9 pins
- ✓ Most heavy duty vehicles will require a J1939 (9 pin) adapter cable

J1708 (6 pin)

J1939 (9 pin)
